ABSTRACTED-PUB-NO: RU 2221522C

BASIC-ABSTRACT:

NOVELTY - The device consists of a magnetic head, having from one side a bolt of a rubber spacer, rubber tube, through which a steel rope is laid, whose one end is provided with a coupling, and a metal chain of the probe driver is connected to the other end. The probe is convenient for use by one person on a well fixed animal without traumatizing of the mucous coat of the respiratory and digestive systems.

USE - Veterinary medicine, particularly, devices used in practice of veterinary medicine for extraction of metal items from the pregasters

of ruminant animals.

ADVANTAGE - Enhanced convenience of use. 3 dwg
